## About the Program

The Maryland Stem Cell Research Fund (MSCRF) was established by the governor and the Maryland General Assembly under the Maryland Stem Cell Research Act of 2006. The purpose of the fund is to promote state-funded human stem cell research and medical treatments through grants to public and private entities in the state.

## Who Qualifies?

All Maryland-based organizations conducting research and commercializing technologies in the stem cell field.

## About TEDCO

TEDCO works with entrepreneurs and start-ups looking for connection to funding and resources. These companies are at the forefront of innovation as they are developing new, technology-based products to meet needs in a variety of industries. These companies and others in the region are seeking partners to help scale their businesses. TEDCO also works closely with innovators at Maryland’s academic and federal research institutions through its technology commercialization programs. Ultimately, to help established corporations in Maryland maintain a competitive advantage, TEDCO connects them with the newest technology innovations being developed right in their own backyard.
