III. Work Session

The Commission had a working session concerning the Equitech Growth Commission Strategic Plan. The Commission suggested adjustments to the goals and terminology in the strategic plan. The Commission discussed the use of STEAM rather than STEM, the removal of redundant goals, the use of geographically diversity rather than underrepresented, and the use of economically disadvantaged rather than minority.

TEDCO staff introduced potential refinements to the plan including aligning with the Governor's lighthouse sectors, the addition of aerospace, defense manufacturing, reskilling veterans, position navigation, timing, and computational biology sectors. Additional refinements include the use of post-secondary education instead of higher education, more clearly defining STEM as provided in the regulations, including federal resources and physical assets in the entrepreneurial development section.

The Commission highlighted partnering with the Cyber Maryland program regarding resource allocation for physical assets such as prototyping facilities and the integration of AI and machine learning.

The Commission suggested balancing legislative requirements with broader inclusivity to be discussed further.

IV. Approval of Upcoming Meeting and Strategic Plan

Mr. LeMaile-Stovall provided the next steps including implementing the discussed changes to the final version of the strategic plan.

The Equitech Growth Commission Strategic Plan will be considered for approval during the final commission meeting.
